

MS9500 Voyager Series Configuration Setup Fact Sheet

To properly configure your new MS9500 Voyager Series Laser scanner, please follow the instructions below:

Starting at Step 1, scan each barcode until you reach step 7. Scan each barcode only once. This will ensure proper configuration of your scanner for use with your PayGo system.

If you have any questions, please contact technical support at www.christianjames.net/support.html. Follow the instructions as you see them on the site to submit a support request
